Palmitop Design:
Arjun weighs only 800 Grams with grip oriented weight distribution, which maximizes the efficiency of Ultrasonic testing with single hand operation freeing up user's other hand to manoeuvre the probe.

Ease of Use:
Arjun comes with only few keys for operation and menu navigation. The menu architecture of Arjun makes the inspection easy and comfortable for any level of operator.

Display:
Arjun series flaw detectors come with high resolution (800 × 480 pixel) WVGA display. Excellent brightness and option of white background for best visibility in direct sunlight.

Display Rotation:
Display Rotation or Flip feature, is convenient for Left hander as well as Right hander.

Connectors:
Two Lemo Size 06 or Mini Lemo Connectors are fitted on the machine.

Connectivity and Data Storage:
- Micro USB slot for data transfer facility
- Micro SD card slot for data storage, expandable upto 32 GB
- I/O port for Single Axis Encoder input and TTL output for external monitor alarm
IP Sealing:

Mating joints are gasketed for protection against water, splash and dust. It is designed to comply with IP66.

Rugged and Durable:

Arjun is developed to perform in all indoor and outdoor industrial environment. The durable and high industrial grade components incorporated in Arjun give you best protection for your inspection needs. It is tested to meet international standards for optimized performance.

Battery and Charging:

World class high capacity Li-Ion battery which gives 8 hours of continuous operation with full charge. Arjun has special charging circuit for fast charging. Battery can be charged inside the machine as well as EXTERNALLY without engaging the machine by connecting a Charging Dock Station provided along with the machine. So using spare battery round the clock testing is possible.

Easy Replacement of Battery:

Battery Compartment has 'quick release fasteners' for easy and quick replacement of battery.

Standard Kit:

- Main unit Ultrasonic Flaw Detector model Arjun10/20/30.
- Rechargeable Li-Ion Battery pack MB-1 (7.2V, 4AH).
- Charger cum mains adaptor AC-1 (100-250V, 50Hz-60Hz).
- Charging Dock Station for external charging ABC-1.
- 8GB USB flash drive containing User Manual and data transfer software ArjnSoft.
- USB ON the Go (OTG) cable for data transfer.
- Neck Strap for extra protection.
- Pelican type carrying case.
Measurement Resolution:

Measurement resolution of 0.01mm for better accuracy. Two independent gates with amplitude measurement up to 125% FSH.

DAC:

Auto Plotting standard dynamic DAC/TCG for easy defect evaluation. Multiple curves with user selectable dB intervals (1dB to 14dB). Any of the curves can be selected as flaw monitor gate.

Onboard DGS/Avg:

Onboard DGS/AVG for defect size evaluation. Echo signals are evaluated in reference with standard DGS/AVG associated with particular probe type and material being tested.

AWS D1.1:

Built in Software for AWS which provides dynamic reflector indication ratings for various AWS weld inspections. This allows efficient inspection by eliminating manual calculations.

Encoder Input:

Single Axis Encoder Input for Real time probe positioning (mm/Inch).

* Available only in Arjun 20 & Arjun30.
** Available only in Arjun30.
UT Data Recording:

It comes with the continuous UT Data Recording facility with Colour Flaw Plotting. Upto 100 Hours of UT Data Recording (A-Scan and Colour B-Scan) can be stored on 8GB Micro SD card. It comes with Non-Tamperable Date/Time stamp, which is best for Evidence Based Testing. Options of Playback and Analysis of A-Scan and colour B-Scan for analysis on main unit of Arjun are available.

Analysis:

- Recorded data can be transferred to PC using USB cable or USB OTG Cable for Analysis.
- After the test data are transferred to PC, analysis is possible using ArjnSoft software.

Display of Data Uploaded on PC

Reporting, Printing and Documentation:

Reports in PDF and WORD format can be generated from A-Scan and colour B-Scan recorded files with all essential information like operator details, job details, and defect details for subsequent printing and documentation

** Available only in Arjun30
Pulser/Receiver Characteristics

Dead Zone/Near Surface Resolution in Angle Probe:

Angle Probe: 4MHz, 70 Degree.
Reflection from 1.5mm SDH from V1 Block

Dead Zone/Near Surface Resolution in Normal Probe:

Normal Probe: 4MHz, 10mm Dia.
Reflection from 5mm Step of VW Block.

Dead Zone/Near Surface Resolution in TR Probe:

Twin Crystal Probe: 4MHz, 10mm Dia.
Reflection from 3mm Step of VW Block.

Far Surface Resolution:

Normal Probe: 4MHz, 10MM Diameter on V1 Block Resolution Notch.

Penetration Power:

Normal Probe: 2MHz, 24MM Diameter on V1 Block Perspex insert.
Total number of back wall reflections are 6 full and 7th about 40% FSH with noise level about 10% FSH.

Sensitivity:

Normal Probe: 4MHz, 10mm Dia.
Reflection From 1/64" (0.4mm diameter) FBH of ASTM Standard block.
**Technical Specification**

### Time Base:
- **Test Range** (Arjun10, Arjun20):
  - 2.5 mm to 5 meter (in steel). Fine mode adjustable in step of 1 mm.
- **Test Range** (Arjun30):
  - 2.5 mm to 10 meter (in steel). Fine mode adjustable in step of 1 mm.
- **Velocity**:
  - 1000 m/s to 15000 m/s. In Hot Key mode it has 21 pre-set values. Fine mode adjustable in step of 1 m/s.
- **Delay**:
  - Up to 120 mm adjustable in 0.01, 0.1 mm or 1 mm step.
- **Horizontal Linearity**:
  - Non Linearity ±0.5%
- **Unit of Measurement**:
  - Metric (mm) and Inch

### Pulser/Receiver:
- **TxPulse**:
  - Square wave pulse
- **PRF**:
  - 50Hz to 1KHz coupled with test range in three adjustments
- **Gain**:
  - 100 dB calibrated gain adjustable in 0.1, 0.5, 1, 2, 6 or 14 dB step
- **Test Modes**:
  - Pulse echo and Transmit/Receive
- **Rectification**:
  - Full wave rectification with filtering.
- **Partial Rejection**:
  - 0 to 125% FSH with LED indicator
- **Frequency Range**:
  - Broad Band amplifier (0.5 MHz to 15 MHz)
- **Vertical Linearity**:
  - Non Linearity ±3%
- **Connectors**:
  - Lemo 00 (2 Nos.)

### Monitor Gates:
- **Independent Gates**:
  - Two fully independent gates GATEa and GATEb for flaw echo monitoring and thickness/distance measurement. Start and Width adjustable over full screen. Threshold level adjustable over 0 to 100% FSH.

### Display:
- **LCD**:
  - 5 inch Colour Wide VGA display (800x480 pixel, size 108x64 mm) with five different colour sets.
- **Update Rate**:
  - 60Hz Display rate.
- **Reference Waveform**:
  - Reference A-Scan pattern of standard test object can be saved and recalled in the background for easy comparison during testing
- **Video Filled**:
  - Solid filled echo patterns for better visibility.
- **Video Dynamic**:
  - Dynamic echo patterns which saves the last maximized echo amplitude for reference.
- **Brightness**:
  - Variable 0 to 100% brightness.
- **Clock**:
  - Records real time date and time of UT Data saved.

### Standard Software Options:
- **DAC**:
  - Dynamic DAC curve can be digitally plotted (smooth parabolic curve) on screen with selectable additional offset curves from 0 to 14 dB in 0.1 dB selectable steps. DAC curve can be set as flaw monitor gate. DAC curve can be plotted using minimum 2 to maximum 10 points.
- **TCG**:
  - Time Corrected Gain for echo amplitude compensation
- **On-board DGS/AVG**:
  - Defect size evaluation using predefined probe settings and custom probe set-ups, ERS (Equivalent Reflector Size) can also be displayed on the screen in mm/inch.
- **AWS D1.1**:
  - Built-in for rating of defects in accordance with AWS Specification D1.1

### UT Data Recording:
- **Built-In**:
  - Carries out 100 Hours of continuous UT Data Recording (automatic A-Scan and B-Scan recording on SD Card) which can be replayed and analysed in machine as well as PC

### Colour Flaw Plotting/Colour B-Scan:
- **Colour Flaw Plotting/Colour B-Scan**:
  - Real time Colour coded Encoded/Un-Encoded colour B-Scan along with A-Scan on the Screen which can be transferred to PC. Also analysis of A-Scan and B-Scan can be done in the machine as well as PC.

### Memory:
- **Micro SD Card Slot**:
  - SD Card slot for all standard micro SD cards (up-to 32 GB) supported.
- **A-Scan**:
  - 500 A-Scan can be saved in internal memory and huge A-Scan storage capacity on SD Card depending on SD Card size.

### General:
- **Size**:
  - 117 x 176 x 56 mm (WxHxD)
- **Weight**:
  - 800 grams with Li-ion battery
- **Battery**:
  - Hi capacity 7.2V, 4AH Lithium Ion battery
- **Battery Life**:
  - 8 Hours when fully charged
- **Charging Method (Standard)**:
  - Internal with power adaptor
- **Charging Method (External)**:
  - Externally with charging docking station and power adaptor.
- **Power Adaptor**:
  - Charger cum mains adaptor AC-1 (100-250V, 50Hz-60Hz).
- **Software**:
  - ArjunSoft Software for Data Transfer, Analysis, Reporting, Documentation and Printing.
- **Temperature**:
  - Operating temperature 0 to 55°

*Available only in Arjun 20 & Arjun30.

**Available only in Arjun30.
